GRAPHICS MATERIAL ON KKP-1 COAL COMBINE

Requests for copies of, or further information on, the illustration described herein should be addressed to Graphics Register, CIA, by referring to report number and item number.

1. Location: USSR

Caption and Description: "Diagram showing operation of KKP-1 coal combine." The combine (6) is lowered against the face by cable (2) and winch (1). Compressed air fed through hose (4) powers the motor (8), which rotates the cutting element (7), and moves it back and forth along the frame as it chips off the coal. Water for allaying dust runs through the hose (5). Loose coal falls through the collecting space, or "magazine" (9), into the cars below

Photograph Description: Size, 12 x 4½ inches; good; pulp paper
